

SCS Skills Pathway for Cloud

MARKETING PLAYBOOK

What is the Skills Pathway for Cloud?

This pathway is designed for professionals like you to launch or grow your cloud career with the right skills and certifications.

How do I start?

01

Read up on the four entry-level job roles which are of interest to you.

02

Find out and complete the certifications required for apprenticeship or job interviews.

03

Start sourcing for jobs vacancies through job portals

Guiding you towards four exciting Cloud Career Paths

Cloud Infrastructure Engineer

Design, implement, and manage cloud infrastructure and services, automate deployments, and optimise performance for reliability, scalability, and security.

[More Information](#)

DevSecOps Platform Engineer

Automate and secure CI/CD pipelines, integrate compliance checks, and manage infrastructure with IaC tools to enable efficient and secure software delivery.

[More Information](#)

Cloud Software Engineer

Design and develop cloud-native applications, build scalable solutions, and collaborate across teams to ensure seamless deployment, integration, and performance.

[More Information](#)

Cloud Solution Architect (Associate)

Support the design and implementation of cloud architectures, ensuring scalable, secure, and cost-effective solutions while contributing to best practices and optimisation.

Meet
Linda Lee
Application Developer,
Group Technology
DBS

After 13 years in media as a video editor, Linda Lee pivoted to tech, inspired by a self-taught “coding grandma.” She leveraged her coding passion and problem-solving skills to thrive at DBS Bank.

Seize new careers in Technology like Linda with the SCS Skills Pathway: <https://skillspathway.scs.org.sg/cloud>

Meet
Bella Tan
Cloud
Infrastructure
Engineer,
ST Engineering

From securing crime scenes to safeguarding digital spaces, Bella T. applies the same discipline and problem-solving skills — moving from 4 years in the Police Force to protecting national security solutions.

Turn your interest in tech into impact for digital security with the SCS Skills Pathway: <https://skillspathway.scs.org.sg/cloud>

Meet
Vicardo Ng
Senior Director
for CloudOps,
NCS Singapore

As Senior Director for CloudOps at NCS, Vicardo bridges legacy systems with modern AI-powered solutions, driving GPU-as-a-Service platforms and leading teams to build secure, scalable cloud ecosystems for public and enterprise clients.

Take your expertise to the next level with the SCS Skills Pathway: <https://skillspathway.scs.org.sg/cloud>

Meet
Kong Le-Yi
Cloud Platform Engineer,
Centre for Strategic Infocomm
Technologies (CSIT)

For Le-Yi Kong, a gradual interest and curiosity in tech led her to a fulfilling role as a Cloud Platform Engineer at CSIT. Her advice: take time to explore and invest the effort to truly understand the craft before making the leap.
